OFFICE FURNITURE

SZK FILING CABINETS

Metal filing cabinets are aesthetic, functional, solid and most importantly, they allow to maintain perfect order in documents and files. Documents in various sizes may be stored in our cabinets - from standard sizes like A5 or B5 to A3 to other more unusual sizes.

- Drawers are installed on double extension ball bearing slides, protected from falling out.
- Cabinets are equipped with a special mechanism allowing to open only one drawer at a time, which prevents the cabinet from tipping over.
- Central locking mechanism of drawers.
- Maximum drawer load capacity is up to 50 kg.
- We offer self-adhesive cardholders corresponding to the number of drawers.
- Chock for levelling the cabinet included.
- Cabinets meet the requirements of storing documents imposed by GDPR.

OFFICE FURNITURE

FURNITURE SETS

We present a few suggestions which depict how our metal furniture can be put together. Such solutions guarantee perfect managing of space and maximising storage space.

Examples are as follows:

- filing cabinets with cabinets for documents with sliding doors as top cabinets,
- office cabinets with top cabinets - filing cabinets with wing and shutter doors + top filing cabinets.

■ Cabinets meet the requirements of storing documents imposed by GDPR.

IMPORTANT: Furniture sets require fixing to each other and securing against displacement.

Wardrobe cabinet (including bars for coat hangers).

DESK CONNECTORS

- Available options of desks equipment:
- perforated front cover,
 - desks connectors,
 - accessories: vertical cable duct, cable duct.
- Desk connectors configuration:
- half-round connector,
 - quarter-round connector.
- To improve user's convenience it is possible to order front covers. These covers allow to hide from view things that are under the desk and to separate legs of interlocutors.
- Front covers are made of powder coated metal sheet.
- Holes in the cover are laser cut, what aesthetically distinguishes them from other metal covers.
- Thanks to desk connectors it is possible to adjust desk arrangement depending on space and shape of a room.
- For the choice of colours see page 142.

SZP MOBILE PEDESTALS

Mobile pedestals of proved quality allow for practical furnishing of office space. Thanks to use of the highest quality steel, SZP mobile pedestals are extremely durable and stable.

■ Ball bearings slides provide smooth and simple extension of drawers.

■ SZP mobile pedestals are equipped with central locking system which opens and closes all drawers at the same time.

■ There are 2 versions of mobile pedestals available:

- lower ones (520 mm high),
- higher ones (663 mm high) allowing to use the space under the desk to the maximum extent.

■ We offer two types of mobile pedestals: with 2 and 3 drawers.

■ Pedestals equipped with 4 swivel wheels, including 2 wheels with brakes.

■ They are covered with melamine top. For the choice of colours see page 142.

■ Drawers are mounted on full extension ball bearing slides - 40 kg load capacity.

■ Size of a drawer: 330 x 420 mm.

■ Pedestals with a central lock placed on the right side of a pedestal.

OPTIONAL ACCESSORIES:

- plastic pencil box as an insert,
- fronts of the drawers made of melamine covered board.

OFFICE FURNITURE

HEIGHT ADJUSTABLE DESKS

Workers in offices and other workplaces spend a lot of time at their desks, often sitting in one position, what affects their health and spine. According to specialists and therapists height adjustable desks are the best choice for our health. Ergonomic standards require the angle of 90° between arm and forearm when sitting at the desk. Therefore, a height adjustable desk is an ideal solution.

BENEFITS:

- It allows to adjust the top of the desk to an individual user. A taller person may adjust the height of the desk to their need.
- Switching from the sitting position into standing position and the other way round ensures a body motion, thus well-being improvement and better work effectiveness.

Desks with adjustable height are equipped with intelligent control panel for height adjustment. It offers wireless Bluetooth technology, memory for two positions and a LED reminder.

DESK ADJUSTMENT

To set a desk the panel must be bent up or down. Position of the body can be changed during work even without looking at the device and without diverting attention away from the performed activity.

CONTROL PANEL

TECHNICAL SPECIFICATION

REMINDER

The desk panel has a built-in LED, which reminds about the necessity of switching your body position during work.

There is also a possibility to change the time interval between the reminders. To set your own intervals of time the application Desk Control must be downloaded. Using this application through your smartphone you can e.g. control the desk setting, receive reminders and save chosen top settings. The application enables connection via Bluetooth and it is available for the iOS and Android devices. You can save the two most frequent settings for the tabletop. After the chosen settings are saved the panel bends the desk. Therefore you can change your body position during work easily.

A safe desk load capacity is up to 100 kg. The desk is equipped with lifting pillars and control system ensuring silent and smooth work of actuators, smooth start and stop.

OFFICE FURNITURE

ACCESSORIES

Every office device, if it is not wireless, uses cables. When planning the office interior arrangement, cables must be taken into consideration. A vertical cable duct hides cables connected to the central unit (keyboard, monitor, printer). It looks like a regular element of the desk and gives it original look. Furthermore, cables do not tangle under your feet or lie unaesthetically under the desk.

Office desks may be equipped with accessories:

- media ports,
- mobile pedestals with an upholstered seat,
- cable ducts,
- cable feedthrough,
- cable management spine,
- tops made of 18 mm melamine covered board.

As well as other equipment - according to the customer's needs.

For the choice of colours see page 142.

TECHNICAL SPECIFICATION

MEDIAPORTS

Media ports enable to connect the necessary media directly to sockets recessed in a table. A lockable cover with brush pass allows for ergonomic use of media port, both in open and closed position. We offer the possibility of any configuration of necessary slots (from 2 to 10 media modules). There is a possibility of installing the following sockets:

- power sockets,
- computer slots.

CABLE FEEDTHROUGH

Cables connected to a mouse, loudspeakers or a laptop are very problematic when sitting at a desk. A solution to this problem is to install special cable feedthrough which get rid of that issue.

CABLE MANAGEMENT SPINE

A vertical cable management spine hides the cables connected to one Central Unit and plugged into the nearest socket (recessed e.g. into the floor). Cable management spine is very aesthetical and it gives original look. In addition, cables do not tangle under your feet.

OFFICE FURNITURE

TABLETOPS

- Tops are made of 18 mm thick melamine.

COLOURS OF TOPS:

- grey
- cream
- white
- black
- Sonoma Oak
- Lancelot Oak

- Sides covered with the colour of the top.

- Sides covered with black veneer - optional (at extra charge).

CABLE DUCT

A horizontal structural beam under the top strengthens the stiffness of the construction and serves as a horizontal channel allowing to hide wires in an aesthetic way. This keeps all cables tidy and makes workplace look exceptionally aesthetic.

- Cable duct is included in standard equipment.

CABLE FEEDTHROUGH

Cables connected to a mouse, loudspeakers or a laptop are very problematic when sitting at a desk. A solution to this problem is to install special cable feedthrough which get rid of that issue.

CABLE MANAGEMENT SPINE

A vertical cable management spine hides the cables connected to one Central Unit and are plugged into the nearest socket (placed e.g. into the floor). Cable management spine is very aesthetical and it gives original look. In addition, cables do not tangle under your feet.

OFFICE FURNITURE

STK COFFEE TABLE SKA1 LOCKERS

Coffee tables are simple and at the same time elegant, functional and practical. They perfectly match Scandinavian and simple styles of interior design. They complement the interior designed in loft style and modernise a classic space.

The form of coffee table makes it ideal for the living room (additional desk) or for the relaxation area. At present coffee tables are used more and more frequently in business areas as a place for business conversations. They also appear more and more often in media (discussion panels, debates).

- A set of coffee tables consists of two tables: one higher coffee table and a lower one which can be hidden under it.
- In order to enable sliding the lower coffee table under the higher one, a bottom bar was removed in each of them. This is also a great visual asset.
- Both coffee tables have tops made of melamine and levelling feet.
- Colours of the tops - according to our standard offer of tops - see page 142.
- We offer three sets of coffee tables:
 - two sets with a square top (60x60 cm & 80x80 cm),
 - one set with a rectangular top(120x60cm).

SKA1 LOCKERS

A small locker/box for storing tiny items. Doors equipped with cylinder lock in 1 point. Cabinets may be fixed together.
