

Opis

The WQST carts are the latest solutions in the field of storing team's weapons and tactical equipment. Built based on the proprietary Q-SYSTEM technology, which provides unprecedented capabilities in terms of optimizing equipment storage. The innovative Q-SYSTEM solution enables the safe storage of gear. Both sides of the cart are divided into dedicated sections. The equipment section is for storing helmets, vests, belts, bayonets, and other items. On the other side of the cart, there is a section responsible for storing weapons, three additional magazines, and ammunition crates. The carts are available in versions for 3 and 6-person teams.

Cechy charakterystyczne

Wózek Warsztatowy WW

- 5 years of warranty (according to Malow product warranty terms).
- Carts designed for storing the complete gear of 3 and 6-person teams.
- Adapted for storing long weapons, helmets, magazines, ballistic vests, ammunition crates, belts, bayonets, and other smaller equipment items.
- Carts are delivered fully assembled and do not require assembly.
- Made of sheet metal with a thickness of 1.2 – 3.0 mm.
- Carts are available in versions designed for 3 and 6-person teams.
- The carts have swivel wheels, two of which have brakes. The wheels are made of non-marking material.
- Perfect for use in warehouses, barracks, and shooting ranges.
- Welded construction, additionally reinforced with welds that stiffen the structure.
- The carts are made of steel protected by the zirconium conversion method and painted with powder coating.
- Available in 16 colors from the RAL palette at no extra cost.
