SOCRATE

SOCRATE: detail of the transparent glass shelf

SOCRATE: detail of the steel shelf

SOCRATE: detail of the steel sliding closing

The aesthetic virtues of the SOCRATE system

- A clean, streamlined design and understated elegance lend the Socrate system the unique ability to fit beautifully into any type of setting – in historic residences or modern new constructions. The sleek steel uprights afford a visually lightweight and extremely elegant appearance to the bookshelves. An example of perfect integration between form and function is achieved by the design of the horizontal and inclined steel rods that represent the stylistic character of the product as well as allow the shelves to be combined, without the use of additional supports.

- The Socrate system is an "open system" since it can evolve and transform, expand or change after its original arrangement as needed to fit the space. Rooms be decorated starting with its simple structure – adding the most appropriate accessories, changing up the finishes or details, to keep the look fresh and new. The spaces can be renovated as needed without having to change the basic elements.

- Using the Socrate system, it is possible to create complete furnishings, from bookshelves and display cases to retail furnishings, etc., while maintaining a certain stylistic uniformity.

- The systems are completed by a large number of accessories that can often be added as needed to either Socrate and Socrate Parete. Both Socrate lines share the same look and the same finishes, so they can be used together in the same room, without creating mismatched style. Another effective decorating idea is to pair Socrate with other furnishings in the room.

- The upright of the Socrate line is also available in chrome plated steel version to add even more elegance to the most sophisticated spaces or executive offices or reception areas.

INTERIORS Caimi

Functional features

- The standardization of the product is expressed through the ability to combine several units, the ease of assembly and disassembly, and the interchangeability of the components, all features typical of industrial-produced products and designed and developed exactly for this purpose.

- Stability and durability are guaranteed by the skilful method of workmanship of the metal. The technical details have been studied to meet the safety requirements set down by current law – rounded edges, accident-proof end caps, folded metal sheet, superior hygiene and resistance to flame, etc.

- The product has been submitted to a number of stringent quality tests (UNI/EN)

- The shelves can be moved just about anywhere along the upright, thereby creating shelf space of variable heights, without wasting space.

- Several types of shelves are available, including shelves in scratch-proof micro-perforated steel sheet. The unusual micro-perforated texture and the powder-coated finish ensure exceptional durability against abrasion caused by sliding out books and moving racks.

- Durable powder-coated finish in mat white and metal grey for the uprights and metal grey and matt white for the shelves and accessories. Note the special scratch-proof characteristic of the finish.

Technical information of the Socrate system

SHELVES:

96 cm shelf accommodates about 35 books

56 cm shelf accommodates about 20 books

96 cm shelf accommodates about 11 racks (8.5 cm wide)

56 cm shelf accommodates about 6 racks (8.5 cm wide)

Accessories

Socrate comes complete with a variety of accessories and can be easily incorporated with the SOCRATE PARETE system, also by Caimi Brevetti.

- The wide range of accessories produced by Caimi Brevetti can easily supply complete systems for any type of settings. The general product catalogue includes accessory articles such as waste paper baskets, floor-standing and wall-mounted coat racks, umbrella stands, display cases, computer stands, tables, chairs in individual and multiple seating configurations, office accessories, wall clocks, table lamps, etc

- Ease of functional transformation and application of accessory elements

- The SOCRATE "Open" system is like a "mechanical game" that can subsequently evolve, expand or change the spaces created. One of the most interesting features of the product is its ability to increase the furnishings as needed and simply and practically change the layout of a room.

- The same system makes it possible to create bookshelves as well as any number of other decorating accessories, such as displays for new literary items and promotions, elements that can meet current needs of "on-line" consultation of computerized files or over the Internet, all the while maintaining a certain stylistic uniformity to the room.

The SOCRATE system is frequently supplied for library furnishing uses because of its functional characteristics and because of its ability to expand in direct proportion to the expansion or changes in the library holdings.

Dimensions of the SOCRATE system

Depths: available in two sizes of 35 and 45 cm

Heights of the uprights for D45 cm: 238 – 200 – 162 – 105 – 86 – 47 cm
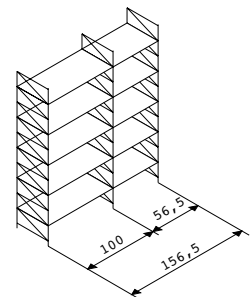

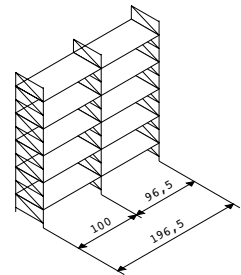

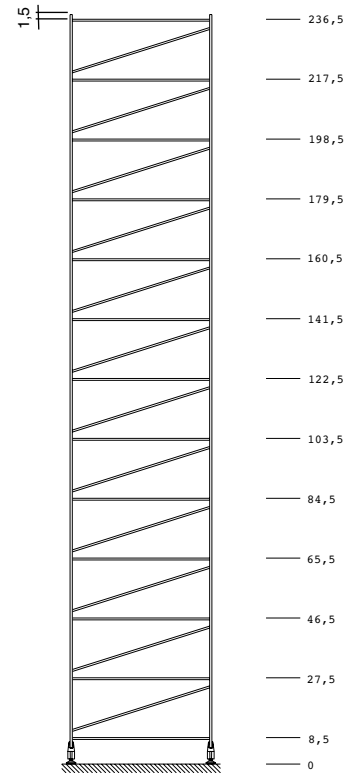

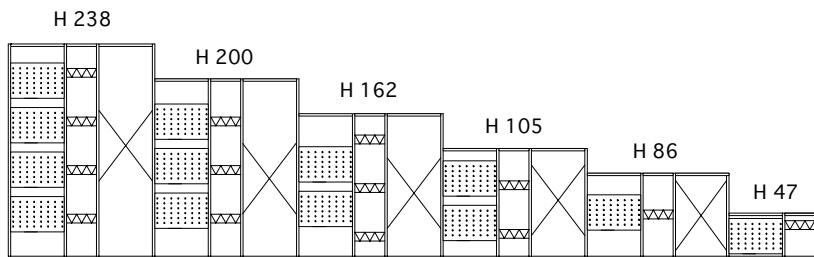

Heights of the uprights for D35 cm: 238 – 200 – 162 – 86 cm

Length: First unit L=100 or 60 cm

      Following units L=96.5 and 56.5 cm

Upright colour: Mat white, metal grey or chrome-plated

Steel sheet shelf colour: Metal grey or matt white

Glass shelf colour: Transparent

Load-bearing structures

Note that the elements necessary to ensure the stability of the Socrate units are: at least two uprights, at least two shelves and one or more load-bearing structures.

The minimum number of load-bearing elements to use for the various heights of the uprights are shown in table 1.

Remember that only the elements described in this paragraph are considered load-bearing elements, namely: bracing crosses, backs in steel rods or back panels in steel sheet.

Load-bearing elements are the articles listed in table 1
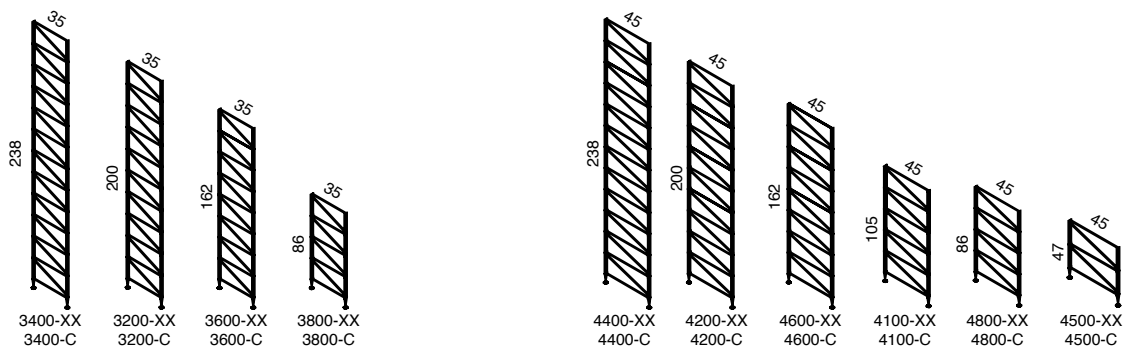

Uprights

Materials: welded, powder-coated steel rods

Colours: matt white or metal grey or chrome-plated steel

Features: uprights consist of three Ø7 mm steel rods line up at the front and three identical rods in the back, held together by pairs of diagonal rods Ø6 mm set 19 cm apart. The uprights have feet and tips in a high-tech polymer with threaded insert in zinc plated steel, high-tech polymer protective caps.

Notes: the distance between the vertical rods is 5 mm and allows M4 screws to pass through to fasten accessories, bracing crosses, etc

Dimensions: L96 x H6 cm (cod.2757-XX)

Materials: 3 mm powder-coated steel sheet, with a holes at either end

Colours: metal grey or matt white

Assembly: fastens onto the vertical rods of the uprights with M4
                 screws, wing nuts and washers

Notes: with 20x9 mm slots for fastening the blister holder
                 (art. 2765), hanger support (art. 2770) and chrome plated
                 tubular steel supports (art. 2763)

2765

Use only with support:
2757

Blister holder in chrome-plated steel:

Dimensions: D20 x L2,8 cm

Materials: steel rod Ø5 mm with slotted hardware plate to fasten
                 onto the universal supports

Colours: chrome-plated

Assembly: fastens onto slotted hardware plate at each end, M4
   screws, wing nut and washers

---

2763
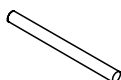

Use only with support:
2757

Chrome-plated metal support:

Dimensions: L30 x Ø2 cm

Materials: chrome-plated steel tube with a threaded M8 bushing
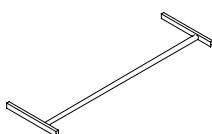

Assembly: fastens with M8 screws

2770-XX

Use only with support:
2757

XX=colour option:
GM = Metal Grey
BO = Matt White

Hanger holder coated steel:

Dimensions: L36 cm

Materials: Ø25 mm powder-coated steel sheet, fitted with pegs
                 Ø6 x H30 mm, located 40 mm apart for fastening hangers

Colours: metal grey or matt white

Assembly: fastens with M8 screws

---

2812-XX
2862-XX

XX=colour option:
GM = Metal Grey
BO = Matt White

Clothes rack/foot rest:

Dimensions: SOCRATE 35   L96 x D33,5 cm (cod.2812-XX)
                 SOCRATE 45   L96 x D43,5 cm (cod.2862-XX)

Materials: - chrome-plated Ø20 mm tubular steel
                 - side brackets in 1 mm powder-coated steel sheet in
                  metal grey or matt white

Assembly: fastens directly onto the horizontal rods of the upright
                 with M8 screws

## 2895-XX
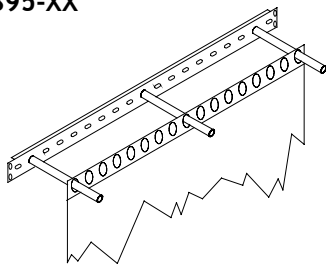

XX=colour option:
GM = Metal Grey
BO = Matt White

Technical drawing holder:

Dimensions: L96 x D30 cm

Materials: - universal support in powder-coated steel sheet, 3 mm
                   thick, with a hole at each end
                 - L30 x Ø2 cm chrome-plated steel tubes, fitted with a
                   threaded M8 bushing at the end

Colours: metal grey or matt white

Assembly: - bracket fastens onto the vertical rods of the upright M4
                   screws, wing nuts and washers
                 - Fasten of the tubes to the slots of the support by M8
                   screws

Notes: adjustable space

2746-XX
XX=colour option:
GM = Metal Grey
BO = Matt White

Sign banner:

Dimensions: L12 x H12 cm

Materials: folded 1 mm powder-coated steel sheet

Colours: metal grey or matt white

Assembly: fasten onto the vertical rods of the uprights with M4
                 screws, wing nuts and washers

6A52

Use only with shelves:
3010/3060/3012/3062/3910/3960
4010/4060/4012/4062/4910/4960
**63010/63060/63012/63062**
64R100/64R600/64R102/64R602

Shelf marker:

Dimensions: L12 x H2,3 cm

Materials: transparent polymer

Assembly: directly to the edge of the steel shelf with a double
                 sided tape

Notes: code refers to 10 pieces

6A2272
6A2274

Sign bands:

Dimensions: L96 x H10 cm (cod.6A2272)
                 L56 x H10 cm (cod.6A2274)

Materials: powder-coated steel sheet with upper and lower sides folded

Colours: metal grey or matt white

Assembly: hooked onto special steel supports (cod. 6A2278)

6A2278
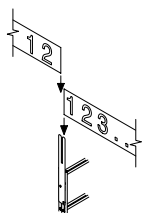

Support for sign bands:

Materials: folded powder-coated steel sheet

Colours: metal grey or matt white

Assembly: fasten onto the vertical rods of the uprights with M4
                 screws, wing nuts and washers

Notes: use only with sign bands cod. 6A2272 e 6A2274

6A2780
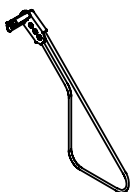

Book holde:

Dimensions: D24 x H28 cm

Materials: folded chrome-plated steel rods, with a high-tech polymer
                 element to allow them to slide along the track inserted
                 below the metal shelves.

Colours: chrome-plated

Assembly: hooked into the track inserted below the metal shelves
                 cod. 63010, 63060, 63012, 63062, 64R100, 64R600, 64R102,
                 64R602

2995/46-XX

Pair of joints for double sided connection:

Materials: transparent high-tech polymer joints and powder-coated steel floor brackets

Colours: transparent joints and metal grey or matt white floor brackets

Assembly: - joints assembled between the vertical rods of the uprights with screws, wing nuts and washers

              - Floor brackets racket fastens directly to the horizontal lower rod of the upright. Adjustable bracket with screws, nuts and washers.

              Fastens to the floor with screws, not provided

Notes: for uprights of max height of 238 cm
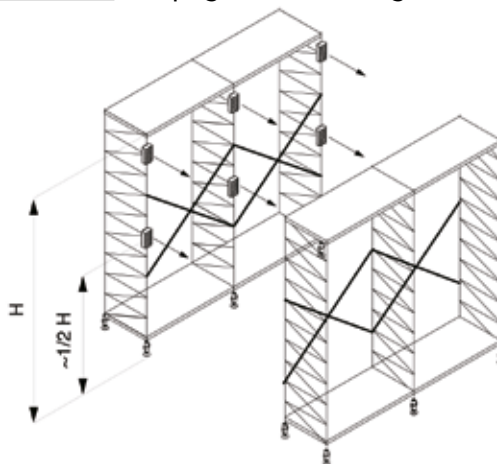

XX=colour option:
GM = Metal Grey
BO = Matt White

2646-XX
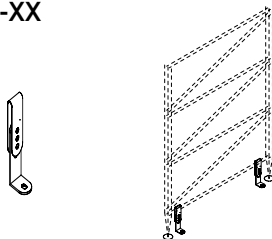

**Pair of floor brackets:**

Materials: Powder-coated steel floor brackets

Colours: Metal Grey or Matt White

Assembly: bracket fastens directly to the horizontal lower rod of the upright. Adjustable bracket with screws, nuts and washers. Fastens to the floor with screws, not provided

Notes: To be uses only for shelving systems not attached to the wall

XX=colour option:
GM = Metal Grey
BO = Matt White

2996-GM
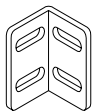

Pair of corner brackets:

Materials: 2 mm powder-coated steel

Colours: metal grey

Assembly: fasten onto the vertical rods of the upright with M4 screws, wing nuts and washers

Notes: code refers to the pair

              Used for the connection of uprights with fixed 90˚ angles

---

4994-XX
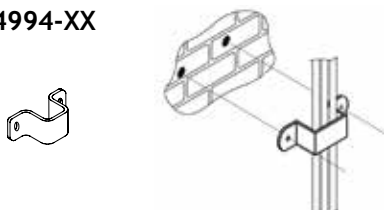

Wall mounting:

Materials: powder-coated bent steel

Colours: mat white or metal grey

Notes: fastens to the wall with screws, not provided

XX=colour option:
GM = Metal Grey
BO = Matt White
